PROFESSIONAL SUMMARY

Passionate and results-driven Computer Science undergraduate with a strong interest in Artificial Intelligence, Machine Learning, and Cloud Technologies. Skilled in Python, Data Structures & Algorithms, and developing intelligent applications using modern AI frameworks and tools. Experienced in building and deploying full-stack projects, with hands-on knowledge of Git, databases, and cloud platforms. Eager to leverage analytical thinking, problem-solving abilities, and a continuous learning mindset to contribute to innovative AI solutions and real-world applications.

WORK EXPERIENCE

AI/ML Engineer Internship **May 2026 - July 2026**
Innovexis

- Built machine learning models and performed EDA using Pandas, NumPy and Matplotlib for data-driven analysis.
- Implemented seaborn and matplotlib for data visualisation.

Google Gemini Campus Ambassador **May 2026 - present**
Google

- Facilitated technical bootcamps and hands-on labs focused on leveraging Gemini models for full-stack applications and AI-driven workflows.
- Mentored student developers on prompt engineering, API utilization, and building scalable solutions for regional hackathons.
- Collaborated with faculty to bridge the gap between academic theory and industry-standard generative AI tools.

EDUCATION

Bachelor of Technology
SRKR ENGINEERING COLLEGE, Bhimavaram

- Current CGPA : 8.5/10

Aug 2024 - May 2028

Class 12
Bharathiya Vidya Bhavans, Bhimavaram

- Percentage: 87

May 2023 - Apr 2024

SKILLS

- Programming: Python, Java, C, SQL
- AI/ML: TensorFlow, Keras, OpenCV, Pandas, NumPy
- Cloud: AWS S3, EC2, Lambda, IAM
- Tools: Git, GitHub, VS Code
- Web: HTML, CSS, JavaScript, Firebase

PROJECTS

Smart QR-Based Student Attendance Svstem HTML, CSS, JavaScript, Firebase

- Built a QR-based attendance system with role-based dashboards and real-time tracking.
- Automated attendance recording and report generation using cloud storage.
- Designed a responsive interface for efficient attendance management.

AI-Based Rock Paper Scissors Gesture Recognition System

- Developed a real-time Rock-Paper-Scissors gesture recognition system using TensorFlow, Keras and OpenCV achieving 95%+ prediction accuracy.
- Processed image datasets and implemented deep learning-based classification using TensorFlow and Keras.
- Integrated webcam input for live gesture detection and interactive gameplay.
- Demonstrated practical applications of machine learning and image processing techniques.
